

## POPULATION GENETICS SEMINARS

AUTUMN 2003

*Wednesdays from 2-3pm, Ashworth Laboratories (ICAPB),  
Lecture Theatre II*

**8 October** Leonid Gavrilov and Natalia Gavrilova (Univ. Chicago)  
*Testing biological ideas on evolution, ageing and longevity with  
genealogical and demographic data*

**15 October** Daniel Gaffney (ICAPB)  
*Deleterious mutation rates in rodent noncoding DNA*

**22 October** Francis Jiggins (ICAPB)  
*The evolution of male-killing bacteria*

**29 October** Sergei Kosakovsky Pond (Univ. California, San Diego)  
*Maximum likelihood methods for detecting positive selection*

**5 November** Mark Kirkpatrick (Univ. Texas)  
*Sex chromosomes, sexual selection and speciation*

**12 November** Ken Wolfe (Trinity College, Dublin)  
*Gene order evolution and birth of a metabolic gene cluster in yeast*

**19 November** Bengt Hansson (ICAPB)  
*On heterozygosity-fitness correlations*

**26 November** Xulio Maside (ICAPB)  
**\*\*Seminar postponed to 4 February\*\***

**3 December** David Shuker (ICAPB)  
*The genetic basis of speciation in a grasshopper hybrid zone*

**10 December** Casey Bergman (Cambridge Univ.)
